

United States Government

Department of Energy

Rocky Flats Field Office

memorandum

DATE: DEC 29 1999

REPLY TO:
ATTN OF: AMFD:FCG:DMN:01057

SUBJECT: Building 779, Main Building Rocky Flats Field Office Decision to Proceed with Demolition

TO: Marvin D. Brailsford, Acting Vice President
Closure Projects Integration
Kaiser-Hill Company, L.L.C.

The Department of Energy (DOE)/Rocky Flats Field Office (RFFO) has received the December 28, 1999, Kaiser-Hill Company, L.L.C. (KH) transmittals of the Building 779 (Main Building) "Closeout Radiological Survey Report" and the "Non-Radiological Closeout Report".

The DOE/RFFO has received verification from the Independent Verification Contractor that survey units meet applicable Derived Concentration Guidance Levels. In addition, the DOE/RFFO review found that, for those areas reviewed, the supporting documentation matched data contained in the final survey report. Further, we have received concurrence from the Colorado Department of Public Health and Environment and the Environmental Protection Agency that the surveys were appropriately performed and that the resultant data fully support a conclusion that the building meets the free-release requirements of the Decommissioning Operations Plan. The DOE/RFFO, therefore, concurs that the building is ready for demolition. You are, therefore, authorized to proceed in the demolition of Building 779, Main Building.

This technical direction is not intended to impact the cost, schedule, or scope of the contract. If you believe there will be such an impact, you should immediately notify the Contracting Officer's Representative and the Contracting Officer, and not implement the technical direction received.

Michael J. Weis
Acting Deputy Manager
